

# CI/CD

Life is short!  
Reality is what you can count on

## Continuous Integration

Combine our developers contribution to build our software

## Benefits

To build high quality artifacts

# Continuous Integration

Combine our developers contribution to build our software

## Benefits

To build high quality artifacts

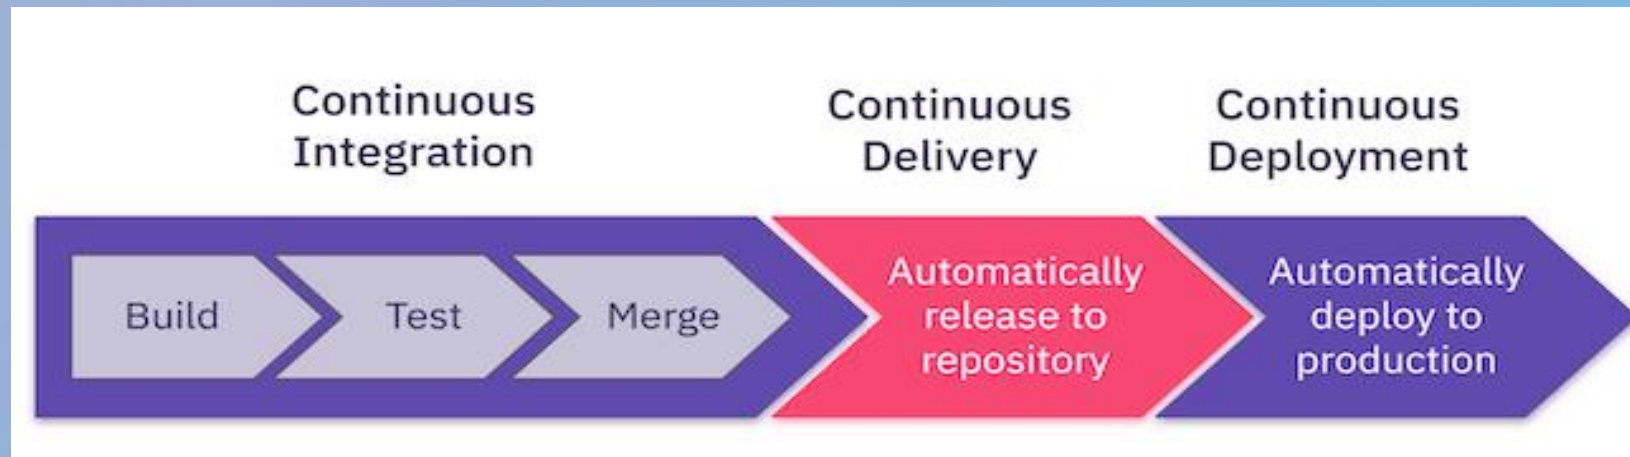

# Continuous Deployment

It's a value adding delivery framework by automated frequently deployments

## Benefits

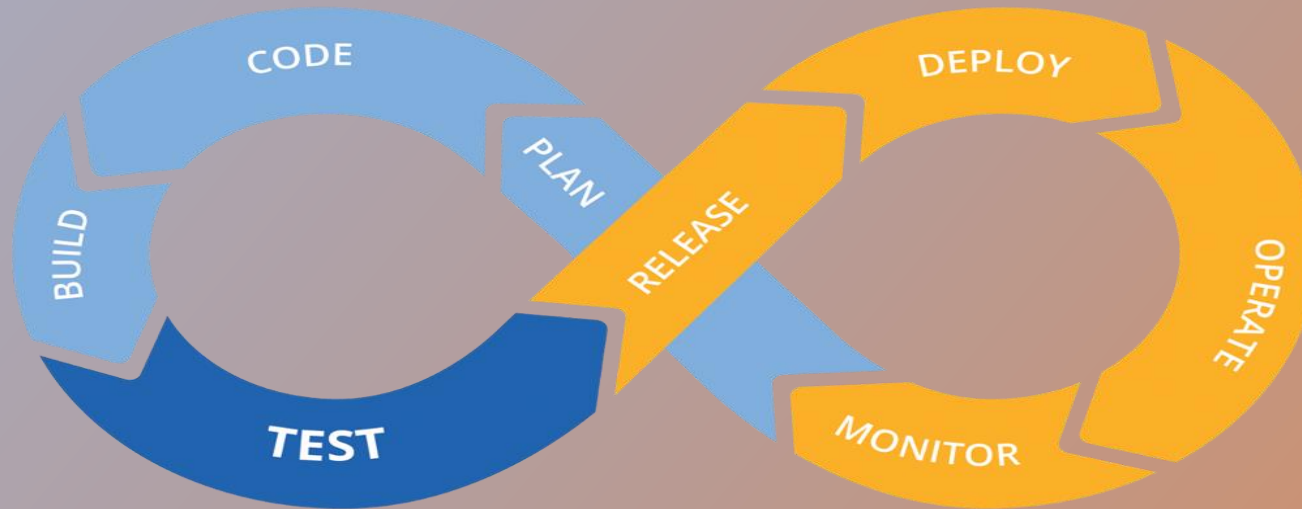

Value realization and get revenue

# CI/CD

## Benefits of CI/CD

- **Reduce Cost** : Less developer time on issues from new developer code and Less infrastructure costs from unused resources.
- **Avoid Cost** : Less bugs, human error, testing time and faster deployments in production.
- **Increase Revenue** : Value adding more quickly in less time.
- **Protect Revenue** : Less downtime and rollback to normal state.

**THANK YOU**
